

# Sound and Vision

From the company that started it all  
NK brings you two innovative new CoxBox models to serve as  
the audio and digital nerve center for your crew.

## CoxBox Core

Completely redesigned, CoxBox Core retains the main functions that coxswains have come to rely on, and surrounds them in a more powerful, efficient, streamlined form. The CoxBox Core features a host of innovations including:

- » A single-piece faceplate and large, **easy to read display** provide a more rugged and waterproof design.
- » Buttons are precisely located and sealed from the elements, reducing the potential for water to enter the unit. The **lower profile design takes up less volume**.
- » New cylindrical battery design provides **10+ hours of battery life** with a more reliable, sustained charge.
- » Wireless stroke rate eliminates need for sensors or magnets.
- » **Monoblock™** connector port relocates microphone, speaker/charging and data ports away from the face of the unit, creating **better readability and simplified serviceability**.
- » **Stablesocket™** design prevents rotation and bending of plug inserts, which protects pins and sockets from damage.

## CoxBox GPS

CoxBox GPS combines the most popular features of our world-class SpeedCoach GPS and integrates those capabilities directly into the new CoxBox architecture. In addition to all the features of the

CoxBox Core unit, CoxBox GPS features:

- » Speed (GPS)
- » Memory
- » Cumulative Splits
- » Distance per Stroke
- » Instantaneous split speed
- » **LiNK Logbook™** streaming compatibility
- » **EmPower™ Oarlock** compatibility\*
- » Integration with soon-to-be available SMART modules, such as seat displays, impeller pod, integrated boat lights, and rapid charging
